# Visit the Jobsite TECH Solutions Area November 14 and 15 in St. Louis

**DEWALT**

## JOB SITE SOLUTIONS

### Jobsite WiFi Access Point

- *Extend WiFi access from the trailer to the rest of the jobsite.*
- *IP67 rated to protect against dust and water.*
- *The Access Point is simple to set up in the field.*
- *Adapts to the changing jobsite.*
- *The adaptable mesh network will also repair itself if one unit goes down.*
- *Contractors that installed the WiFi system report increased productivity, collaboration, and efficiency because the field crew can access data, collaborative software, and project management programs in real-time.*
- *The DEWALT Access Point is proudly Made in the USA with global materials.*

### Manage Your Tools. Anywhere

- *Tool Connect™ is a three-part inventory management solution designed to help you save time and money.*
- *Connect, track, and customize your tools across multiple jobsites. Data from the mobile app automatically updates in your Inventory Manager portal at the office or tool crib to give you real-time information.*

**See the Tool Connect Demo**

### Automated Placement and Design of MEP Hangers

- *DEWALT HangerWorks plug-in for Autodesk Revit is a tool that automates the placement and design of hangers and seismic bracing for MEP systems such as pipe, duct, conduit, and cable trays.*
- *Complex engineering calculations are built-in to the tool that enable it to size hanger assemblies based on the weights of the MEP system including contents (water, wire, air) and determine hanger locations based on building code requirements and user-defined project standards.*
- *Contractors can expect to achieve significant BIM workflow efficiencies, cost savings, and safer buildings.*

**See the Hangerworks Demo**
